

THE FACTS

- 1 In 2019, 1.1 billion people were living with chronic diseases, up from 800 million in 2000. By 2030, this is projected to rise to 1.6 billion.
- 2 Chronic diseases are the leading cause of death and disability worldwide.
- 3 Non-communicable diseases (NCDs) account for 71% of all deaths globally.
- 4 NCDs are preventable and manageable.
- 5 Addressing NCDs is a key priority for the Sustainable Development Goals (SDGs).

GOALS

Global Health Action Plan

- 1 To reduce the global burden of NCDs by 25% by 2025.
- 2 To ensure that all people have access to essential NCD services.
- 3 To strengthen health systems to better manage NCDs.

1. PREVENTION AND EARLY DETECTION

- 1 Promote healthy lifestyles (diet, physical activity, tobacco cessation, alcohol moderation).
- 2 Implement screening programs for high-risk populations.
- 3 Strengthen surveillance systems to monitor NCD trends.

2. TREATMENT AND SUPPORT

- 1 Ensure access to essential medicines and technologies.
- 2 Provide comprehensive patient support and counseling.
- 3 Enhance health workforce capacity for NCD management.

3. COORDINATION

- 1 Foster multi-sectoral collaboration across health, education, and environment.
- 2 Engage communities and civil society in NCD prevention and control.
- 3 Strengthen regional and global partnerships.

These strategies are designed to be implemented in a coordinated manner, ensuring that all people have access to the services they need to live healthy lives.

4. SUPPORT TO HEALTH SYSTEMS

- 1 Strengthen health systems to improve the quality of care and the efficiency of service delivery.
- 2 Invest in health workforce development and leadership.
- 3 Enhance health financing and risk pooling mechanisms.
- 4 Promote digital health and innovation for NCD management.
